Credible Credentialing IMPORTANCE for Trainers & Support Programs

ROLE OF FOUNDATION SKILLS, Understanding LLN & Using the ACSF

Dr Cheryl Livock
WORKSHOP AIMS

- Workshop will enable participants to easily identify students' LLN levels and how to connect needed LLN levels to AQF certificates.
- It will utilize the ACSF (Australian Core Skills Framework) to identify LLN levels.
- It will discuss/gain participants' feedback on the impact of poor LLN skills levels on 'credible credentialing'.

IMPACT OF LLN ACQUISITION ON CREDIBLE CREDENTIALING
WHAT IS CREDIBLE CREDENTIALING?

What are the components of credible credentialing?

• necessary content knowledge attained
• practical ability to apply knowledge in a work situation displayed in workplace scenarios

• to know
• to do – doing implies ability to use critical thinking in applying knowledge attained
In training packages this is represented by:

- required knowledge
- required skills

  - eg **BSBRES401A** – view Training Package
  - eg **HLTEN507C** – view Training Package

**TO BE ABLE TO KNOW & DO** in Australia … adults need more than a basic understanding of English
Current literacy demands in industrialised nations

Mikulecky’s list of changed workplace conditions

• Increases in the demand for literacy,

• Significant amount of reading on the job,

• Increased difficulty level:
  o integrated tasks (reading, writing, speaking, listening & using computers),
  o critical thinking and analysis within a short time period,

• These higher literacy skills required in most jobs in developed nations.

“According to the U.S. Department of Labor, the work areas growing in developed nations are:

- service workers,
- psychiatric aides,
- dental assistants,
- claims clerks,
- secretaries,
- and sales clerks.

These are not high-tech jobs, but jobs that call for two to three hours of reading each day.

Often they are the jobs that in developed nations go to the bottom 30 to 40 percent of a high school class.

These jobs are not going to college graduates, but to people formerly not in the work force or those formerly doing muscle jobs.

What changed is that the lower 40 percent of the population is encountering situations where literacy demands are higher than high school demands.

Even more literacy is called for in jobs with the largest projected growth rates. These include:

- industrial robots—manufacturing them, servicing them, marketing them, and working with them—as well as geriatrics social workers, energy technicians, those who work with industrial laser processing, and emergency medical workers.

These jobs require some training beyond high school. It is becoming difficult for someone who just has a high school diploma to be in more than a dead-end job. Dropouts face even less desirable choices” (Mikulecky 2004,p.4).
Under utilized Labor force – low LLN levels

Diagram 2: The proportion of working age Australians, by labour force status, who have ‘document’ literacy below skill level 3 on the ALLS scale.

- Employed (11,418,100)*
  - ALLS Level 1 and 2*
    - 4,567,240
    - 40%
  - ALLS Level 3 and above^*
    - 6,850,860

- Not in the Labour Force (3,976,210)*
  - 2,653,325
  - 67%
  - 1,322,885

- Unemployed (618,800)*
  - 371,280
  - 60%
  - 247,520

* Trend series data from ABS 2010, 6202.0 Labour Force Australia, December 2010 (pg. 1).
* Data taken from ABS 2009, 6220.0 Persons not in the Labour Force, Summary Results, September 2009 (pg. 10).
^ The ALLS levels here are extrapolated from ABS 2006, 4228.0 Adult Literacy and Life Skills Survey, Summary Results (pg. 38), which shows that approximately 40% of the employed, approximately 60% of the unemployed and approximately 67% of people not in the labour force had document literacy scores below Level 3.
National Foundation Skills Strategy for Adults

Proposed National Strategy (p.3) by Standing Council of Tertiary Education Skills & Employment 2012

THE AUSTRALIAN CORE SKILLS FRAMEWORK

plays a significant part in
Trainers /Tutors
being able to deliver credible credentialing
to their students

CRUCIAL ROLE OF BUILDING LLN SKILLS LINKED TO EACH AQF CERTIFICATE LEVEL

TELLS 2014: Refresh, Refocus,
The TELLS 2014 Professional Development Conference, Brisbane

Dr Cheryl Livock 13 72 48
tafebrisbane.edu.au
WHY THE ACSF?

- Allows VET Educators to assess students’ basic skills levels;
- Allows TRAINING PACKAGE WRITERS to design units of competencies appropriate for certificate levels;
- Allows a connection to workplace requirements for credible credentialing.

WHAT IS THE ACSF?
(i) Three domains of Communication

1. Personal and Community
2. Workplace and Employment
3. Education and Training

(ACSF, 2011, pp.5,8)
## UNDERSTANDING THE ACSF

### (ii) 5 Core Skills areas

1. Learning  
2. Reading  
3. Writing  
4. Oral Communication  
   - speaking  
   - listening  
5. Numeracy

### (iii) 5 Levels of Performance

- Each level has *increasing* levels of complexity.  
- Each level has *decreasing* levels of support  
- First two levels are in *familiar contexts*.  
- Levels 3-5 are in *unfamiliar contexts*.  
- Each level has *consistent* performance indicators

*Table 3: ACSF Performance Indicators*
Spiky Profiles - Students

The ACSF recognises that an individual may be operating across different levels within a core skill, demonstrating some Performance Features across two or more levels, or performing more strongly in one Domain of Communication than in another. It is also likely that an individual will not perform at the same ACSF level across all five core skills. This can be captured visually in what is called a ‘spiky profile’ (Bateson 2001).

Using the ACSF, an individual’s performance across the five core skills can be benchmarked and a spiky profile constructed. This provides valuable information about an individual’s areas of strength and specifically identifies any areas where further training could be beneficial.
WHY USE THE ACSF?

ACSF Levels for Courses & Workplaces

Certificate courses have a generally acceptable ACSF Levels
- as detailed in table

However, specific workplace requirements also can demand different ACSF levels within that one course
- the spiky course profile

FOUNDATION SKILLS NEEDED FOR
full participation in civic life in Australia
AND
CREDIBLE CREDENTIALING

USING KNOWLEDGE OF ACSF & AQF
SPIKY PROFILES
TO BUILD FOUNDATION SKILLS
WHAT ARE FOUNDATION SKILLS?

Foundation Skills include:

- “English language, literacy and numeracy (LLN) – listening, speaking, reading, writing, digital literacy and use of mathematical ideas; and
- “Employability Skills, such as collaboration, problem solving, self-management, learning and information and communication technology (ICT) skills required for participation in modern workplaces and contemporary life”.

Foundation skills development includes both:

1. “skills acquisition and
2. “the critical application of these skills in multiple environments for multiple purposes.”

“Foundation skills are fundamental to participation in the workplace, the community and in adult education and training.”

Dr Cheryl Livock 13 72 48 tafebrisbane.edu.au
Knowledge of the ACSF has underpinned the writing of the FSK units.

- **FSK Units all name their ACSF Level**
- **FSK Units can be contextualised for Industry & Student needs**
FSKNUM14 Calculate with whole numbers and familiar fractions, decimals and percentages for work

Application

This unit describes the skills and knowledge to interpret and calculate whole numbers, routine fractions, decimals and percentages.

This unit applies to individuals who need numeracy skills at Australian Core Skills Framework (ACSF) level 3 to undertake a vocational training pathway or workplace tasks.

This unit is designed for integration and contextualisation with vocational units to support achievement of vocational competency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.
**Elements and Performance Criteria**

<table>
<thead>
<tr>
<th>Element</th>
<th>Performance Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>Elements describe the essential outcomes.</em></td>
<td><em>Performance criteria describe the performance needed to demonstrate achievement of the element.</em></td>
</tr>
</tbody>
</table>
| 1. Identify and interpret routine mathematical information  | 1.1 Select and interpret mathematical information that may be partly embedded in routine workplace tasks and texts  
|                                                              | 1.2 Interpret and comprehend whole numbers and routine or familiar fractions, decimals and percentages including familiar rates |
| 2. Undertake routine mathematical processes                   | 2.1 Perform calculations which may involve a number of steps  
|                                                              | 2.2 Calculate with whole numbers and routine or familiar fractions, decimals and percentages  
|                                                              | 2.3 Convert between equivalent forms of fractions, decimals and percentages  
|                                                              | 2.4 Apply order of operations to solve multi-step calculations  
|                                                              | 2.5 Apply problem solving strategies |
| 3. Check and communicate results                             | 3.1 Make estimations to check reasonableness of problem solving process, outcome and its appropriateness to the context and task  
|                                                              | 3.2 Use formal and informal mathematical language and symbolism to communicate the result of the task |
FSK NUM 08 = ACSF Level 3

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

<table>
<thead>

</table>

Assessment Requirements for FSKNUM14 Calculate with whole numbers and familiar fractions, decimals and percentages for work

**Performance Evidence**

Evidence of the ability to:

- interpret and use common fractions, decimals and percentages in real situations
- choose the appropriate operations to solve real life mathematical problems
- perform calculations involving fractions, decimals and percentages.

Note: Where a specific volume and/or frequency is not specified, evidence must be provided at least once.

**Knowledge Evidence**

Evidence of the following knowledge must be demonstrated:

- place value and use of zero
- relationship between operations
- order of operations
- relationship between fractions, decimals and percentages.

**Assessment Conditions**

Assessment texts and tasks reflect those typically found in the workplace.

Individuals can access own familiar support resources.

Culturally appropriate processes and techniques suited to the language, literacy and numeracy capacity of individuals and the work being performed must be used.
What is needed for Credible Credentialing?

TO SUMMARISE:
In delivering VET training there must be an alignment AND attainment of:

• Foundation skills
  – Reading, writing, oral communication, digital literacy, mathematics & learning skills,

• Workplace content knowledge and practical application
Have your Say

Participants' feedback on

- the impact of poor LLN skills levels
- on 'credible credentialing'
